**UK's largest
privately owned
Generator
Rental Company**

www.pe-generators.co.uk

PE Generators are a specialist temporary power business that provides generators ranging from 15kva to 2000kva, 30 volt to 1 MVA variable, alongside associated ancillaries, on a rental or sales basis. We understand that every customer has a unique set of requirements.

Quality

- ISO 9001: 2000 accredited
- UVDB Achilles verified
- Link up approved
- Setting high industry standards
- Committed to continuous improvement
- Feedback surveys
- Ongoing training & development

Foundation

Initially founded in 1912 as a supplier to the emerging automotive industry, the Turner Group has evolved through steady organic growth as well as acquisition.

Currently, the group enjoys a turnover in excess of £220m, a reputation for profit retention and a solid financial base from which to operate. A privately controlled group of autonomous companies, the Turner Group is engaged in the supply and servicing of equipment, as well as the provision of comprehensive support services.

Although the individual companies span a remarkably diverse range of sectors, first-class service to customers is the principal objective of every single activity.

Employing over 2,400 loyal and dedicated professionals across both hemispheres (mostly outside its native Scotland), the customer-focused group is driven by a passion for taking ownership of customers challenges. Solutions of the highest standard are then implemented to meet agreed timescales and precise requirements. We are the UK's Largest Privately owned Generator Rental Company.

Distribution and Ancillaries

- Mobile fuel bowsers
- Extensive cable stock
- Heavy duty cable protectors
- Distribution panels
- Automatic mains failure panels
- Transformers
- Powerlock connectors
- Specialist busbar & overheadline connectors
- Mobile loadbank fleet

From our large stock of Mains Distribution Units & associated switchgear we can design, supply, hire and install HV, 415 volt, 240 volt and 110 volt power distribution to all applications including factories, ice rinks, hospitals, scanners, site accommodation and hoists.

Secure Containerised Generator

Generator, bulk fuel tank and distribution all housed in one compact secure unit: minimizes risk of theft or sabotage. Fully bunded containers available.

Ex-rental Sales

We replace our rental fleet on a comprehensive renewal programme basis; ex-rental units are always available for sale. This provides a superb alternative to new set sales where build lead time and perhaps also budgets provide possible restraints to your business. All generators have a regular service history that you would expect from a reputable market leader.

Our transport

In house transport vehicles enable us to provide a fast, flexible and cost effective delivery service. The fleet is designed to accommodate our complete range of equipment for every situation. All vehicles are tracked using the latest satellite technology, ensuring all logistics are managed efficiently and on time. To complete the package we use our own drivers thus ensuring equipment is offloaded and positioned correctly.

- Draw bar trailers
- Front & rear mount crane operation
- 4x4 Delivery

Environment

PE Generators are committed to achieving the highest available environmental standards. It is our goal to implement and maintain an effective Environmental Management System throughout our operations which will meet all the legislative requirements relating to our work. We are motivated by the best international practices in the use of materials, supplies and energy and expect similar standards from our suppliers, vendors and contractors. It is our policy to continuously assess our environmental procedures to look for improvements.

Service Range

- State of the art technology
- Synchronous generator technology for multi set, multi megawatt applications
- Remote monitoring
- Generators are supported by a comprehensive range of purpose built individually tailored ancillary equipment
- Experience in standby, no break changeovers, exporting and peak lopping packages.
- All in accordance with BS7671/G.59/BS.EN60439/w and BS7430

Bunded Fuel Tanks

- 2000, 3000, 4500 & 9000 litre tanks
- Braided quick release fuel lines
- In compliance with Pollution Prevention Guidelines (PPG2/PPG26), our tanks have a 110% bund capacity & all hoses & connections are within this bund

Heaters

Heat when and where you need it 24/7 365 days a year. Available with our modern range of indirect diesel fired heaters. Safe and highly cost effective providing heat for any location or application.

- Indirect diesel fired heaters available up to 185kw
- Range of ducting outlets and adapter plates giving great flexibility
- Long run external fuel tanks with quick release fuel connections

People

With 40 years experience, we realise that our people are a vital element of our service. Our staff are a great asset and we pay great attention to training, motivating and retaining our staff to ensure levels of service remain consistently high.

- Specialist trained generator engineers
- Approved in house electricians
- Qualified in house drivers
- 24 hour manned help desk support
- Dedicated account manager
- PTS Rail industry trained

Our commitment

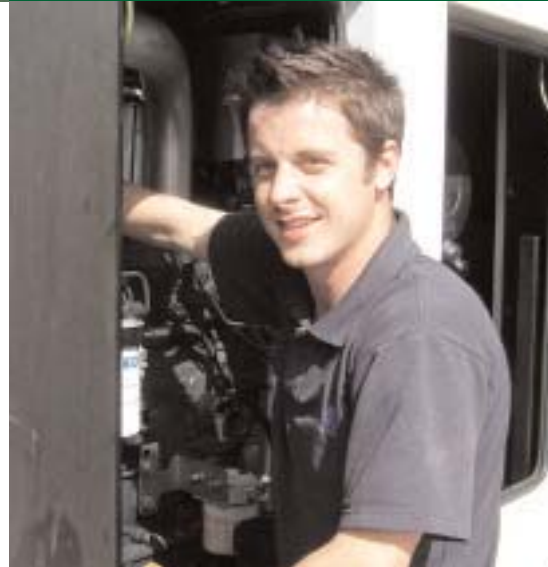

We individually take your project and requirements from site survey through to handover with minimum fuss, giving peace of mind and security from beginning to end. We take pride in our equipment and to ensure that it operates to maximum efficiency and without environmental impact we maintain our fleet to the highest standard. Equipment is continually renewed on a rolling 3 year basis.

Fuel Management

- Ensures uninterrupted power and no down time
- Off road gator 4x4 fuel deliveries
- Bio-fuel available
- Planned and emergency response deliveries 24/7
- Single invoicing for fuel and hire available reducing administration costs
- Reduces the risk of contaminated fuel from 3rd party suppliers
- Environmental Management Contingency Planning

Health & Safety

We are committed to providing the safest working practices and equipment. All depots undergo constant internal and external audits. We are committed to training and developing our people in line with our overall policy and work specific activities, using their input as a valuable source of hazard identification and risk control.
