

PE GENERATORS

National Generator Rental

Distribution and Ancillaries

www.pe-generators.co.uk

From our large stock of Mains Distribution Units, transformers and associated switchgear, we can design, supply, hire and install HV, 415 volt, 240 volt and 110 volt power distribution to all applications including factories, hospitals, scanners, ice rinks, site accommodation, tower cranes and hoists. All our stock is maintained in-house by qualified electrical engineers and tested prior to and after installation. We are able to modify standard equipment to best suit our client's specific requirement, test and provide certification to BS7671.
